

IMAGE ARMOR™

SOLUTIONS FOR THE DTG INDUSTRY

Thank you for your interest in Image Armor™ Inks and taking the opportunity to save time and money in your DTG operation all while maintaining the vivid colors you want and are used to! You can experience increased production times with a 35 second white ink cure time – a time savings of almost 60 seconds over OEM! With brilliant colors, ease of use, and incredible looking prints, the F-SERIES inks are for the serious DTG printer who wants to improve their DTG business!

- IMPORTANT INFORMATION -

By Claiming this FREE Image Armor™ F2000/F2100 inkset, you agreed to PURCHASE (or use) THE OEM CLEANING CARTRIDGES FOR THE CHANGE OVER.

A complete flushing of the white and CMYK ink lines is required.
We **DO NOT recommend inter-mixing** Image Armor™ and OEM inks
due to potential inter-compatibility issues.

Full instructions for a proper change over from OEM to Image Armor™ inks can be found online via imagearmorpt.com or on garmentprinterink.com by searching "F-Series Conversion" OR by scanning either QR code below:
